BUSINESS ADDRESS

Department of Economics, 5067 Lee Shau Kee Business Building
The Hong Kong University of Science and Technology, Clear Water Bay, Kowloon, Hong Kong

DESIRED RESEARCH AND TEACHING FIELDS

Industrial Organization Theory, Empirical Industrial Organization
Field of concentration: IO Theory and Empirical IO

EDUCATION

Hong Kong University of Science and Technology

Ph.D. in Economics	2022 – 2027 (expected)
M.Phil. in Economics	2020 – 2022
B.Sc. in Mathematics and Economics (Minor in Actuarial Mathematics)	2015 – 2019

WORKING PAPERS

- "Designing Return Policy in E-Commerce: A Trade-off between Purchase and Return Efficiency" *(Job Market Paper)*

  Abstract: We study the effect of return policies by asking whether they encourage efficient returns and purchases. A stricter return policy curbs inefficient ex-post returns, but the resulting lower return rates make higher product prices more attractive for sellers, leading to possible exclusion of ex-ante efficient purchases. We compare automatic coverage that reimburses return-shipping costs (RI) with optional coverage (CI) by estimating a structural model of purchase, insurance, and return decisions under monopoly pricing across six apparel categories. A lenient return policy like RI performs better in high-margin, high-salvage categories by expanding valuable purchases, whereas a strict return policy like CI performs better in thinner-margin categories by curbing excessive returns. Partial RPD, a menu pairing a discounted price with a medium restocking fee as penalty, performs better than RI and CI for most categories by better balancing purchase and return efficiency.

- "Product Design with Heterogeneous Search Costs", MPhil thesis, with AU Pak Hung

  Abstract: Building on Wolinsky's (1986) sequential search model with differentiated products, this paper introduces search cost heterogeneity to analyze how firms leverage observable product designs to

influence consumer search behavior. In equilibrium, consumers' search patterns form a partitioned structure: those with low search costs tend to seek niche products, while consumers facing higher search costs gravitate toward standardized products. In the case of two product designs, a reduction in search costs may lead to higher prices for both if the endogenous shift in consumer search modes—the composition effect—dominates the search-encouraging effect. Additionally, we demonstrate that prices respond asymmetrically to decreases in search costs based on the relative position within the distribution where the shock occurs.

WORK IN PROGRESS

- "Too Much Unsold Stock?: Environmental Consequences of Price Commitment", with Kohei Kawaguchi and Kei Kawai

PROFESSIONAL EXPERIENCE

Research

Research Assistant for Prof. Benjamin Bernard, National Taiwan University 2020

Teaching

Lecturer, Math Camp for MSc in Economics, HKUST 2026

Teaching Assistant Coordinator, Business School, HKUST 2025 – 2026

Teaching Assistant, Department of Economics, HKUST (average 4.59/5) 2020 – 2025

ECON2123 – Macroeconomics (4.36/5)
ECON4134 – Economics of Uncertainty and Information (4.66/5)
ECON4999T – Economics of Uncertainty and Information (4.25/5)
ECON5210 – Microeconomic Theory I (4.85/5; 4.83/5)

Presentations (* for scheduled)
APIOC 2026*; 2026 Econometric Society Australasia Meeting (ESAM 2026)*;
HKUST Business School PhD Conference; CEP Brownbag in HKUST;
APIOC 2023; AMES 2023 NTU Singapore

FELLOWSHIPS AND AWARDS

Red Bird PhD Award 2022

Postgraduate Studentship from the HKUST 2020 – present

Research Travel Grant 2020

Academic Achievement Medal 2019

University Scholarship (730K HKD) 2015 – 2019

SKILLS

Technical Skills: R, Python, C++, LaTeX, AWS

Languages: English (fluent), Mandarin (native), Cantonese (basic)
