Hiring Team
Keystone — London
Re: Full Time Economist 2027 (Greenhouse 8211974)

Dear Hiring Team,

I am writing to apply for the Full Time Economist 2027 role in Keystone's London office. I am a Ph.D. candidate in Economics at HKUST, working in empirical industrial organization and digital economics, expected to graduate in June 2027 (and able to finish earlier if helpful). I follow Keystone's digital-competition work closely; for example, the UK advertisers' claim that Google favored its own ad-tech exchange (AdX) raises the same kind of platform-conduct questions my research addresses.

My research uses large proprietary datasets to study welfare and run counterfactuals. My job market paper studies Taobao apparel return policy: I clean large transaction data, estimate a structural model of purchase, return-shipping insurance, and return decisions, and rank policies by seller profit, consumer surplus, and social welfare. With Professors Kohei Kawaguchi and Kei Kawai, I study pricing and inventory under resale price maintenance using monthly bookstore point-of-sale records, combining descriptive evidence, regressions, and a dynamic oligopoly model. I work mainly in Python, R, and C++ on AWS and HPC/SLURM, and I am used to checking results, testing assumptions, and explaining what the numbers imply for the next decision. I also apply merger simulation, market entry and exit counterfactuals, and firm-conduct identification.

I have attached my CV. Thank you for your consideration; I would be glad to provide my job market paper or any further materials.

Sincerely,

Ke-Cheng Hsu (Clio)
