HSU, Ke-Cheng (Clio)

(852) 6840 9753 | khsu@connect.ust.hk | github.com/cliohsu1997 | cliohsu1997.github.io

Professional Summary

Grew up in Taiwan; moved to Hong Kong for university studies. PhD candidate in Economics at HKUST, strong at analyzing returns and inventory on retail and e-commerce data. One paper designs return policy; another studies how firms should stock inventory under demand uncertainty, accounting for stockouts and leftovers. Native Mandarin speaker from Taiwan; professionally fluent in English; Hong Kong permanent resident. Clear communicator who prepares management-ready reports under deadlines. Seeking Graduate Trainee – Buyer (Taiwan / English) at GreenPrice.

Education

The Hong Kong University of Science and Technology, Hong Kong

Doctor of Philosophy in Economics — Expected Graduation: June 2027

Research interests: Empirical industrial organization and digital economics.

Master of Philosophy in Economics — 2020–2022

CGA: 4.1/4.3.

Bachelor of Science in Mathematics and Economics, Minor in Actuarial Mathematics — 2015–2019

CGA: 3.9/4.3.

Awards: Dean's List (2016–2019); University Scholarship (730K HKD); Academic Achievement Medal (top 1%); Postgraduate studentship (1.5M HKD); Redbird scholarship (40K HKD).

Experience

Research Assistant, National Taiwan University — 2020

- Modeled crisis intervention as regulator–creditor negotiation; derived and simulated equilibrium predictions to support policy design.

Teaching Assistant & Lecturer, Department of Economics, HKUST — 2020–present

- Lecturer for MSc Math Camp (4.53/5); TA for PhD and undergraduate economics (avg 4.72/5); clear explanation and stakeholder-facing communication under deadlines.

Projects

Inventory and Pricing under Resale Price Maintenance (RPM) *(w/ K. Kawaguchi, HKUST; K. Kawai, U. Tokyo)*

- Built a dynamic oligopoly model of pricing and inventory under demand uncertainty and RPM; constructed title-by-market-by-month panels from monthly bookstore POS data (deliveries, sales, returns; tens of billions of records across 1,000+ stores), linked via standardized ISBNs and merged with local demographics and title-level information scraped from Amazon in Python.
- Tracked stockouts, returns, and substitution patterns; estimated demand and supply with instrumental variables; reported what the numbers imply for pricing and inventory decisions through weekly descriptive statistics, regressions, and figures.

Return Policy Design in E-Commerce *(Job Market Paper)*

- Built and estimated a structural model of purchase, return-shipping-insurance take-up, and return decisions using Taobao apparel transactions (2017–2023; six categories; ∼20–30% return rates); cleaned and linked orders, prices, insurance, and returns; prepared charts and written summaries ranking policies by profit, consumer surplus, and welfare.
- Developed a reproducible pipeline in Python, R, and C++ on AWS and HPC/SLURM; delivered careful quantitative work to fixed deadlines.

Skills

Languages: Mandarin (Native, Taiwan); English (Fluent); Cantonese (Basic).
Technical: Python, R, Stata, C++, Excel, LaTeX; data cleaning, competitive / pricing analysis, management reporting.
Right to work: Hong Kong permanent resident.
